You’ve just been diagnosed with low bone mineral density, you believe that you are at risk, or you are several years into your bone health regimen and want to make sure that you are doing your best. Sound familiar?

Juvent has you covered.

You see we are a company committed to being a key partner in your lifelong bone health journey. For over 25 years the name Juvent has represented the world’s safest and most effective bone health exercise device. Our valued customers have asked us to offer an equally impressive supplement. After years of research and sourcing we believe we have the best:

Let me introduce you to the HydroxyBMD System. This System is unique in many ways and allows you and your physician the flexibility to fit YOUR needs. It’s not a one size fits all solution that is so often the only choice.

Key Elements in Your Successful Bone Health Program.
What makes this Professional Quality Bone Health System so Unique?

✓ bonolive® a pharmaceutical-grade olive leaf extract which improved bone and cardiovascular health in clinical studies.

✓ A Calcium Free (CF) option partnered with a natural calcium/mineral add-on allowing you and your physician to decide how much calcium and minerals are right for you.

✓ A New Zealand microcrystalline hydroxyapatite concentrate (MCHC): a complex crystalline compound containing numerous essential trace elements that naturally occur in healthy bone.

✓ Patented 6 Stage Chelated Minerals for maximum bioavailability and less likely to cause discomfort.

✓ ch-OSA, a patented bioactive form of silicon that assures maximum absorption.

These are just some of the highlights of this powerful system. But equally as important is the assurance that only the highest quality ingredients have been used and what is on the label is what is in the product.

We believe that HydroxyBMD coupled with our Micro-Impact Platform will be key elements in your successful bone health program.
During the Day:

- Provide a Multifaceted Approach to Bone Maintenance and Strength*
- Provide Foundational Bone Support with Choline-Stabilized Orthosilicic Acid (ch-OSA®)*
- Support Bone Collagen Formation, Bone Mineral Density, and Bone Calcium Binding Sites*
- Provide a Complementary Combination of Micronutrients*

**These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure, or prevent any disease.

HydroxyBMD™ AM is our calcium/MCHC-free formula that combines Bonolive® olive extract with ch-OSA, D3, and MK-7 to provide bone and cardiovascular support.*

Bonolive® Olive Leaf Extract

Bonolive is a pharmaceutical-grade olive leaf extract that features a unique polyphenol complex (40% polyphenols), including oleuropein. This proprietary olive extract preparation is fully water-soluble, which makes its oral bioavailability superior. Historical and traditional use as well as clinical testing and toxicological assessment confirm the safety of its oral consumption.*

Historical and traditional use as well as clinical testing and toxicological assessment confirm the safety of its oral consumption.*

Stem cell research has shown that olive polyphenol bioactivity is associated with increased osteoblast formation, increased extracellular matrix mineralization, and overall bone maintenance.[3] Five preclinical studies in a well-established rat model for bone health demonstrated that olive polyphenols exert protective effects on the formation and maintenance of bone.[4-8] In addition, a randomized, double-blind, placebo-controlled clinical study provided strong support for Bonolive supplementation positively supported BMD at the lumbar spine and the femur neck compared to a placebo.[1] The treatment group also experienced reduced adipocyte formation and a positive effect on lipid metabolism (i.e., cholesterol and triglycerides), confirming Bonolive’s double mode of action: To positively influence bone health and cardiovascular health.

**Daily Value (DV) not established.

Directions:

Take one packet daily in the morning.

(Consult your healthcare practitioner prior to use. Individuals taking medication should discuss potential interactions with their healthcare practitioner. Consider total vitamin K intake (food + supplements) if you are taking blood-thinning medication. Do not use if tamper seal is damaged.)

Does not contain: Wheat, gluten, soy, dairy products, fish, shellfish, peanuts, tree nuts, egg, ingredients derived from genetically modified organism ( GMOs), artificial colors, artificial sweeteners, or artificial preservatives.

Storage: Keep tightly closed in a cool, dry place out of reach of children.

HydroxyBMD™ PM is a well-researched, standardized extract from one of the world’s safest premium sources of bone - free-range New Zealand cattle. HydroxyBMD™ PM contains microcrystalline hydroxyapatite concentrate (MCHC), a complex crystalline compound containing calcium, phosphorus, bioactive growth factors, type I collagen, amino acids, glycosaminoglycans, and a broad range of essential trace elements that naturally comprise healthy bone.*

HydroxyBMD™ PM delivers 500 mg of MCHC per capsule along with additional calcium and magnesium in the form of highly absorbable Albion® minerals. Vitamin D, in the form of cholecalciferol, supports intestinal calcium absorption and homeostasis in the body and completes the comprehensiveness of this bone-support formula.*

Clinical Trials suggested that HydroxyBMD™ PM supplementation was well-tolerated and yielded a positive outcome for dental status, bone integrity, and healthy bone metabolism.[1,2] A randomized, controlled study indicated that the addition of HydroxyBMD™ PM to exogenously administered hormones provided statistically significant support (4.7%, P<0.1) to vertebral bone mass.[3] Another study of 60 subjects suggested that bone mass was maintained while on HydroxyBMD™ PM.[3]

Directions:
Take four capsules with your meal daily in the afternoon/evening.

(Consult your healthcare practitioner prior to use. Individuals taking medication should discuss potential interactions with their healthcare practitioner. Do not use if tamper seal is damaged. The labeling on this product does not comply with California’s Proposition 65. Therefore, this product may not be sold in California.)
