Easily view XBRL documents with robust display options

Until now, viewing XBRL taxonomies and instance documents has been difficult, if not impossible. Rivet Software's new Dragon View™ XBRL viewer is the solution to working with XBRL taxonomies and instance documents in a way easily understandable by finance and accounting professionals. Whether you want to explore XBRL data for the first time or need more advanced viewing and rendering capabilities, Dragon View provides an easy to use and robust solution.

Dragon View, used in conjunction with Rivet's industry-leading Dragon Tag® XBRL enabler markup solution, provides start-to-finish support for your XBRL projects. Incorporating the same user-centric and easy-to-learn functionality that has earned Dragon Tag praise by finance professionals across the world, Dragon View lets you view XBRL information without being exposed to the technical complexity sometimes associated with XBRL.

Dragon View Features

- Quick and easy display of XBRL information with robust viewing and display options
- Export XBRL information into Microsoft Excel® for further review and analysis
- Drill into taxonomy and instance document supporting information including definitions and authoritative references
- Opens any XBRL 2.1 compliant document

Export XBRL taxonomies and documents to Microsoft Excel

Dragon View is designed for anyone within the business reporting supply chain interested in working with XBRL documents. For users who want to begin exploring XBRL, Dragon View's provides simple yet powerful viewing functionality. For more advanced users, Dragon View provides detailed insight into taxonomy and instance document information in order to verify XBRL data as part of a final review and approval process.

Dragon View installs easily on your computer and does not require Administrator rights. Once installed, Dragon View works with XBRL documents loaded locally or on the Internet and provides the speed and performance users expect from Rivet products. With robust and customizable view options, XBRL information is presented the way you want to see it.

Export XBRL Data to Microsoft Excel

XBRL instance documents contain valuable financial information that can be used to build charts and graphs. Dragon View leverages the analytic power of Microsoft Excel by letting you easily export XBRL data into a spreadsheet for further analysis and use. Coupled with Dragon Tag's markup functionality, Dragon View rounds out Rivet's continued commitment to provide XBRL support for the productivity application of choice for accounting and finance professionals the world over - Microsoft® Office.

Detail panes enable drilling into XBRL supporting information, including definitions and authoritative references

View XBRL Documents The Way You Want To

Dragon View makes working with and viewing XBRL taxonomies and instance documents fast and simple. Dragon View provides application-level and “on the fly” viewing options that let you control the way you see the information. XBRL taxonomies and instance documents provide a wealth of information that can be very overwhelming. Dragon View’s focus on simplicity ensures you see just the information you need to get started. When additional detail is required, Dragon View offers a number of configurable view options to let you gain additional insight into XBRL documents.

Configurable View Options

Control how Dragon View displays XBRL information. Choose from display options such as:

- *Column Filters* for selecting specific companies, segments, calendars, scenarios, or units.
- *View Types* for displaying information based on Presentation, Calculation, or Element views
- *Labels* for viewing one or more label values (roles) for XBRL elements
- *Language* for changing information “on the fly” from one language to another
- “*Intelligent*” grouping of instance document columns

Language and multiple view options enable simplified viewing of XBRL documents

Free to Use!

Dragon View is a free to use application that provides the ability to view XBRL 2.1-compliant taxonomies and instance documents. Display options enable you to create view custom views while detailed taxonomy information and basic search and printing capabilities enable you to locate and review information quickly and efficiently.

Beyond basic viewing capabilities, Dragon View offers a broad range of enhancements such as being able to open multiple taxonomies and instance documents at the same time. Dragon View also provides integration with Microsoft Office by offering the ability to export XBRL documents to Microsoft Excel as well as advanced search capabilities.

Download a trial version of Dragon View from the Rivet Software web site (www.rivetsoftware.com/dragonview) and experience the power of viewing XBRL data easier than it’s ever been before!
